(Indian Mona bee)

"Most common honey bee"
All \Rightarrow India

It is mild in nature
शांत

Mona bee \Rightarrow 3-4 Kg

शिरो
honey

Apis florea
"Bhueng bee"

Smallest in size
Mild in nature

commercially
rown X

only about
250 gram

↓
"honey"

Apis Mellifera

"European bee"

It is mild in nature.

9-10 times -
as compared to
Mona bee (3-4 Kg)

40 Kg \Rightarrow honey

Italian variety

Most common
Used in
Commercial pool

15,000000 lifespan
 "laying egg"
 Per day \Rightarrow 2,000

Agriculture / Bee Keeping Organisation

non reproductive group of worker bee is also

They show \Rightarrow [Polymorphism] called Eusocial insect
 AND "Good division of labour"

Queen

It is about 15-20 mm long.
 worker bee

3 times larger 3 times heavier
 "leg and wing are short
 but crop is long" 2,000

\Rightarrow Ovary filled with
 egg's

Only one Queen needed, fertile
 It has 32 chromosome

Royal Jelly

"egg production)

Drones

About "100 male bee"
 ↴ one hive
 \Rightarrow 7-15 mm long

* Salivary gland, मास गland
 लार ग्रा, 'Second'
 Stings दंड X

Nutrition "worker bee"

(FUNCTION)

↳ Sole duty of drone is
 ↳ fertilized to queen

\Rightarrow Chromosome \Rightarrow 16

Worker's

Maximum no. in a hive -
 smallest individual.

* Tibia \Rightarrow "pollen basket"
 "hind leg" ↓

collection of
 pollen grains
 Worker glands
 ↴ 2-5 abn

6-8 (life)"
